## THE JEWISH LEAP YEAR 5736 WELCOMES 2 ADARS

### BACKGROUND OF JEWISH CALENDAR

The two great luminaries placed by G-d in the firmament of the heaven on the fourth day of creation, are the foundation for the calculation of days, months and years. As it is written: "And they shall be for signs, for seasons, for days and years" (Genesis I).

The sun is the foundation for the counting of years, since in addition to its daily rotation, it also has a yearly rotation. The moon is the foundation only for the counting of months. The time that passes from one appearance of a new moon till its reappearance, constitutes one month.

The solar year consists of 365 days and 6 hours. The lunar month however, consists of 29 days, 12 hours, 44 minutes, and 3 and 1/3 seconds. Multiply the lunar month by 12, and you have 354 days, 8 hours, 48 minutes and 40 seconds. Hence, 12 lunar months add up to a period of time which is less than the solar year by 10 days, 21 hours, 11 minutes and 20 seconds.

When the Torah commanded the people of Israel to sanctify the months (Exodus 12), it also commanded: "Observe the month of spring and you shall make a Passover unto the L-d your G-d" (Deuteronomy XVI)—that is to say simultaneously with our fixing of the months in accord with the lunar molad we are also to make certain that the month of Nisan should always occur in the spring season of the solar month. How then can we reconcile these two requirements? If we were to calculate our years on the basis of 12 lunar months, we would fall behind each solar year to the extent of somewhat less than 11 days. If we were to base our year on 13 lunar months, we would be ahead of each solar year, by some 22 days.

It was therefore commanded as a "law unto Moshe from Sinai," that we should intercalate years: some of our years should be regular years, consisting of 12 months; and our intercalated years should consist of 13 months.

**SHABBOS SHEKOLIM**

Saturday, February 28th, marks the first of the Special Sabbaths preparatory to the Passover Festival. This day is known as Shabbos Shekolim and falls on the Sabbath preceding Rosh Chodesh Adar II in a leap year.

In the days of the Temple in Jerusalem it was the custom to remind all of their obligation to give the half *shekel* on the first day of Adar. The special Torah reading, *Parshah*, refers to the half shekel that every Israelite, twenty years of age or over, gave as his equal share toward the support of the Temple services (Exodus XXX: 11-16).

Although the Holy Temple in Jerusalem is destroyed, we Jews in the course of our checkered history have never lost faith in its ultimate restoration. Thus we have never ceased our offerings of *shekels* in every generation for the maintenance of Torah institutions and our creative efforts for the sake of our Torah ideals.

No wonder that the public reading of *Parshas Shekolim* has special significance for us as we look forward to the day when it will again be resumed in its complete observance.

O.A.R.

**MR. & MRS. LEAGUE NEWS**

The hosts at the Board meeting on Wednesday, March 11th, will be Mr. and Mrs. Gerard Benjamin. One half hour before the meeting, at 8 P.M., Rabbi Reichel will lead in a discussion on gems in the current Sedrah.

**THE TWO ADARS**

*continued from page 1*

After several regular years pass and the differential of days between them and the solar years adds up to approximately one month, we add another month before Nisan in order that Nisan might always fall in the spring and that it might never fall at a greater distance from its proper time than 20 odd days.

Why is the month of Adar alone used for a leap year? For in speaking of Pesach the Torah stated: "Observe the month of spring." The month which immediately precedes Nisan was therefore intercalated to form a leap year.

Why is Purim observed during a leap year, the second Adar? Since the year of Haman's decree was a leap year and it occurred during the second Adar we place "one redemption adjacent to another" — the redemption of Esther to the redemption from Egypt.

All the laws which apply to the month of Adar during a regular year, apply to the second month of Adar during a leap year. Purim and the special Parshiot are then observed in the second Adar.

It is also customary to observe the fourteenth and the fifteenth days of the first Adar with some festive spirit; Tachanun being omitted, as are fasting or eulogies. (This year they fall on Sunday and Monday, Feb. 15 and 16.)

*From THE BOOK OF OUR HERITAGE  
by Eliyahu Kitov*

For one who died in a regular Adar, the *yahrzeit* is observed twice — with *kaddish* priorities and fasting in Adar I and with *kaddish* in Adar II; for one who died in a leap year, only one day is observed.

**OPEN MEETING ON MONDAY FEBRUARY 32**

You and your friends are cordially invited to attend an Open Meeting on Monday, February 23rd at 12:30 P.M. The guest speaker will be our own MRS. MAURICE (SALLY) GOODGOLD, Vice-Chairman of local Planning Board 7, which encompasses the West Side from 59th to 110th Streets. Her topic will be: "What Does the Planning Board Do?—What Can the Local Citizen Do?". Besides this most interesting program, very important plans will be discussed for our forthcoming Donor Luncheon. Coffee and cake will be served.

**THE PALESTINIAN ISSUE**

Some facts concerning the geographical region known as Palestine.

(a) Historically, geographically and ethnically, Jordan is part of Palestine. Both the West and the East Banks of the Jordan River are parts of the Land of Israel, or Palestine, in which - under the terms of the League of Nations Mandate assigned to Britain on July 24, 1922 - a national home was to be established for the Jewish people on the basis of the League's "recognition... given to the historical connection of the Jewish people with Palestine and to the grounds for reconstituting their national home in that country."

(b) Most Palestinian Arabs continue to live in a Palestinian State (Jordan). The vast majority, moreover, are citizens of that Palestinian State, including the Arab population of Judea-Samaria (the West Bank), now under Israeli administration.

(c) It is, therefore, false to allege that the Palestinian Arabs have been "deprived of a State of their own," or that they have been "uprooted from their homeland."

Israel is convinced that this problem can and must find a just and fair solution in the context of negotiations between Israel and Jordan, which itself is part of Palestine, and which can add to its delegation certain Palestinians who live in the area. Israel's official recognition of the existence of the problem of an Arab Palestinian identity is a matter of record. Clearly, those who recognize the P.L.O., or who, in one way or another, lend it their support and encouragement, as the United Nations General Assembly and the Security Council have done, in effect lend support to the P.L.O.'s central aim of replacing the State of Israel with a P.L.O.-run Arab State.

We are grateful to America for her understanding and support of Israel in the Security Council.
